

Section II:

6.3.3 - General Information

A Committed Partner for the Township

Veolia, working as the direct partner to the **Township of North Brunswick** for the delivery of operations, maintenance and management (O&M) services for your water system, will deliver a comprehensive approach backed by our firm's global-leading experience.

We understand that your community is looking to partner with an experience operation services provider, a partner with the base of resources, capabilities and proven experience needed. Our firm will work with your community to deliver efficient and cost effective operations of your water treatment, storage and distribution facilities, enhancing the Township's ability to provide for the health, safety and welfare of your residents.

Veolia is the safe choice to assume responsibility for your important water system assets and operations. Our experience and capabilities are unmatched, as are our firm's resources and technical competence in transitioning and managing facilities of a similar size and complexity as your water utility operations.

Our firm now ranks as a leader in water operations with ongoing O&M agreements with communities like yours, including Rahway and Kearney among others, as well as water operations that serve major urban areas, such as Jersey City and Haworth.

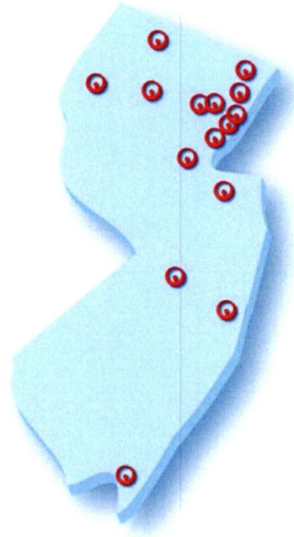

In total, Veolia now provides water service to over 1.4 million people in New Jersey, operating water treatment, storage and supply systems that provide more than 300-MGD of supply. Our water and other operations in the State are supported by a staff base of more than 1,110, including New Jersey licensed Water Operators that are engaged in ongoing O&M and Regulated Utility operations, and our Municipal Operations corporate business and management team that is based at our municipal operations headquarters office in Paramus.

Further, our operations in New Jersey are part of Veolia's industry leading operations group in North America, with over 10,000 employees working at more than 350 locations. Under ongoing contracts with municipalities throughout the U.S. and Canada, our firm provides water services to more than 5 million people under long-term public-private partnerships and regulated utilities operations.

Globally, Veolia now ranks as the leading provider of water operations services to municipalities in all parts of the world, with more than 179,000 employees. These staff operate and maintain small and large scale systems that provide over 95 million people with drinking water and more than 62 million people with wastewater service.

Through the footprint of our operations and resources that Veolia offers, we provide the local knowledge, experience and resources that will be critical to supporting your operations. This will provide for access to business and management resources and a strong base of technical support to ensure the smoothest and most-effective transition, followed by the safest and most-reliable operations.

In this section we profile the structure of our company, documenting the corporate commitment and resource that we will bring to your community.

**Water Operations Leader
in New Jersey**

- 15 Water/WW Operations Sites
- 9 Water Plants (268-MGD)
- 3,500 miles of Water Lines
- 14 Water Pump Stations
- 38 Water Wells
- 28 Water Tanks

VEOLIA IS THE O&M SERVICES LEADER IN NORTH AMERICA

Industry Leading Resources and Commitment to Service

1 – Company Information

Veolia Water North America Operating Services, LLC (Veolia) is the Respondent/ Proposer and will be the direct contractor to the Township of North Brunswick for the delivery of the service under this contract.

This Proposal has been executed by our proposed Principal for this project, **Keith Oldewurtel, Chief Operating Officer** for Veolia’s Municipal Water Contract Operations Business – including those in the State of New Jersey.

We have also completed, and provided in Section VII, Proposal Form A-3, Disclosure of Ownership, which details the structure of our company – as a Limited Liability Company (LLC), with a Business Registration Certificate in the State of New Jersey (see Appendix D).

Veolia has an established presence in New Jersey and our Municipal Corporate Office in Paramus will be the Primary Business Office supporting this operation:

Veolia Water North America Operating Services, LLC - 461 From Road, Suite 400, Paramus, New Jersey 07652
Contact: Keith Oldewurtel,
 Chief Operating Officer
Telephone: 616/308-8037
Email: keith.oldewurtel@veolia.com

Veolia’s New Jersey based Project Director and Operations Manager, Tim Shea, P.E., will coordinate the transition process and then directly manage and support our O&M team. This will provide our local team with access to the range of business, technical and other resources in Paramus, along with those from our other water operations in New Jersey, along with the resources of our firm in the East region and Veolia’s unmatched national base of resources and expertise.

2 – Parent Company

Veolia in New Jersey and the East region is part of a national company that manages water and wastewater operations throughout the U.S. Our North American parent company has business offices at: Veolia Water North America Operating Services, LLC - 53 State

Street, 14th Floor, Boston, Massachusetts 02109. This parent company operates through subsidiary companies in the East, South, Central and West regions of the U.S., supported by business and management groups that provide the technical, financial, legal, procurement and other teams that support our local operations and projects.

3 – Subcontractors

Veolia is not proposing to partner with any local contractors or vendors to deliver the core O&M services under this contract; and is not proposing any joint venture relationships.

We will use local contractors, suppliers and vendors, as may be needed, to support the work of our O&M team for routine and emergency response types of needs.

In securing any subcontractor services, Veolia will seek to use local firms and provide a preference for small and disadvantage businesses. Additionally, where any subcontractors are used by Veolia, those firms will remain accountable to the Township for the delivery of these services and ensure that any subcontractors follow our safety, compliance and quality standards for the operations.

4 – Corporate Organization

Figure 1.2-1, below, provides a simplified corporate organization chart.

This shows our management approach, with Veolia as the O&M provider supported by our North American parent company (the corporate entity at which financial statements and reporting are provided).
